February 17, 1989

Dear Dr. Nuenberg, Nobel Laureate

From the enclosed Bulletin you will see that an extraordinary community of persons and groups in all walks of life have agreed to speak out with determination and persistence to stop all torture and abduction in Chile.

This community now includes many, many thousands of persons, among them 125 Nobel Laureates, eminent writers, artists, scientists, clergy, trade unionists, National Academies of several countries, Presidents of many leading universities in many countries.

Chile is just the focus of the present campaign. When it ends successfully, we will campaign to end apartheid in South Africa. By focussing on one issue at a time, we intend to build an ever-increasing community to ensure that every government lives up to the Universal Declaration of Human Rights.

These Campaigns are the donation of time and energy by some hundreds of busy scientists, writers, and others. We have no salaried employees and our expenses are just the unavoidable ones (but high): printing, postage, telephone.

We separate these Campaigns from all political movements and we are neither controlled, nor financed, by any group of any kind. If we could raise sufficient funds, we could use a part-time secretary, and greatly expand the reach of our Campaigns.

Would you be willing to have your name appear in our Bulletins as supporting the Chile Campaign? the Apartheid Campaign, when it begins?

There would be no other obligation involved, although any other help you could give the Campaigns; financial, publicity, would be welcome.

Israel Halperin
